

## DR. PETER T. HARNOIS

**CHAIRSIDE STYLE** Open, honest, approachable and sincere **FAVORITE PART OF YOUR JOB** The joy I bring to so many people. Many patients are brought to tears when they see their results for the first time. The emotional outpouring is incredible **HOBBIES** Tennis, bird watching and supporting environmental causes **ALTERNATIVE OCCUPATION** Field biologist I **START EACH DAY** Swimming, at 4:30 in the morning **I'M NEVER WITHOUT** A positive outlook and regard for how I can take the best possible care of my patients

## LEADING THE FIELD

When patients visit the spa-like dental office of Dr. Harnois, they are in for a star-treatment environment, starting with **COMPLIMENTARY VALET PARKING** upon arrival. Each patient is scheduled with ample time in between to ensure there is **NO WAITING TIME FOR YOUR APPOINTMENT**. Replete with computer areas for patients' use, massage dental chairs, ceiling-mounted flat-screen televisions, wood-grain floors, cherry wood cabinets, and residential-style décor, patients are made to feel like they are in a plush, cozy home as opposed to a dental office. "My philosophy involves giving patients the most natural-looking smile in the least-invasive way," says Dr. Harnois—who uses LUMISmile™ technology to create **DIGITAL SMILE PREVIEWS** of what patients can expect to look like after their **LUMINEERS®** procedures. "Patients can pick their teeth's shades, sizes and colors, and visualize their final outcomes. The procedure is custom-tailored to each patient. No guesswork is ever involved." Moreover, Dr. Harnois is currently offering **COMPLETE SMILE MAKEOVERS STARTING AT \$5,999**. "We use the innovative **LUMINEERS** delivery system called **LUMITRAY™**, a procedure that allows us to apply over eight upper- or lower-arch contact lens-thin LUMINEERS all at once, reducing the time and cost involved."

INSIDE INFORMATION

# a true visionary

With a practice in Downtown Hinsdale and now one in Chicago, Dr. Peter T. Harnois redefined what a trip to the dentist entails through his use of cutting-edge, homeopathic LUMINEERS. With 28 years of experience and an approach that eliminates the use of shots and drills, Dr. Harnois is a go-to dentist for 21st-century smile rejuvenation via the use of contact lens-thin LUMINEERS and zero-sensitivity Sapphire™ tooth whitening.

Focusing his practice on LUMINEERS, Dr. Harnois offers individualized results. "Unlike conventional veneers, which can require the dentist to grind away sensitive tooth structure, we specialize in LUMINEERS, which are stain-free, reversible and permanently bonded over patients' teeth," he says of his two-visit procedure that can correct chipped, gapped, crooked, worn, fanged and uneven teeth. "Clinically proven to last over 20 years, requiring no temporary restorations and more translucent than traditional veneers, there is simply no better option for patients nowadays," he says.

Having performed LUMINEERS on his daughter, wife and niece, Dr. Harnois treats every patient like family. In terms of in-office tooth whitening, he favors Sapphire technology, which can brighten teeth seven shades in 30 minutes. "Unlike UV-based whitening that can cause a slight burn to the surrounding skin, Sapphire Professional Whitening uses a plasma light to gently whiten natural teeth and cosmetic restorations," says Dr. Harnois, who lectures internationally and trains other dentists on how to properly place them. To uphold his regard for patients' well-being, Dr. Harnois offers courtesy concierge services for out-of-town LUMINEERS guests. His complimentary concierge menu includes airfare and hotel accommodations, a chauffeur to and from the airport, ticket arrangements for local sporting events, shows and tours, and post-treatment spa and salon services. "I don't believe care should start and end with treatment, which is why I also provide out-of-town LUMINEERS patients with a maintenance kit and 10-year warranty."
